CAREER OBJECTIVE

Front-end developer with 2.5 years of experience, able to work with JavaScript, React / Redux. I can do a responsive design of web applications, create a backend on Node JS/Typescript, and use modern development tools.

I am constantly improving my development skills and learning new technologies and libraries. I aspire to be a full-stack developer.

PROFILE

- 2.5 years of experience in Front End development
- Creating web applications from scratch, participate in the discussion of the best solutions for projects.
- I constantly collaborate with the backend or participate in the creation of the backend for projects myself.
- Design overall architecture of the UI.
- Good experience in responsive developing web applications. Adaptation for desktop, tablet, mobile devices, as well as in a horizontal and vertical position.
- Experience in GitHub, Jira for source code management and for version control

PROFESSIONAL EXPERIENCE

- Working as a front-end developer in ZenBit Teach from September 2019 to Mart 2020.
- Working as a front-end developer in Ithinkers since May 2020.

TECHNICAL SKILL

- **Web technologies:** HTML5/HTML, CSS3/CSS, Bootstrap, jQuery, JSON
- **JS frameworks:** React/Redux, Nextjs, Nuxt
- **Programming languages:** JavaScript, Typescript, Node, PHP
- **Testing Tools:** Chrome Developer Tools
- **IDE:** MS Visual Studio
- **Methodologies:** Agile
- **Operation system:** Windows

EDUCATION

- **Sumy State University (SumDU)**
Diploma of education, engineer standardization and certification of the food industry (2009 - 2013)

PROJECT DETAILS

- **Application for food delivery service**

Description

E-app is an application with which you can control products on the site, customer orders, create promotions, and send push notifications.

This application is used by clients throughout Ukraine and a little abroad. We help our clients optimize their e-commerce business processes.

Responsibilities

- Responsive web design using HTML, CSS, JavaScript, React, Styled Components technologies.
- Implemented routing by application, created complex sub-sub-categories using react router.
- Processing requests as well as creating and connecting modules such as loading banners, generating qr codes, sending push messages.
- Worked on JIRA as a version control

Environment

React/Redux, PHP, JavaScript, HTML5, CSS3, Jira
